Palmki biometric palm vein authentication: your hand is your key

Palmki is the product of Perfect-ID, an innovative technology company specialised in biometric hand palm authentication. The highly secure Palmki solution can be used for access control, time and attendance, cybersecurity, process automation, and payments. No accessories are needed anymore; all you need is your hand palm.

Palmki solutions:

- Access control
- Time & attendance
- Cybersecurity
- Proces automation
- ID verification
- Payments

Why Palmki:

- No log-ins or passwords
- No badges or keys
- Highest level of security
- High speed and user experience
- Environmentally conscious
- Hygienic (contactless module)

Problems solved by Palmki:

- Theft or loss of badges, keys, or other accessories
- Forgery or fraud
- Complex management of access cards and keys
- Costs for badges or other accessories
- Inaccurate identification
- Time wasted during check-in and access granting
- Security vulnerabilities due to weak passwords
- Hacking and cybersecurity issues
- Unauthorized access
- Need for better and more sustainable solutions (e.g., no plastic badges)
- Multiple authentication methods required for high-security environments or cybersecurity
- Improved management of work schedules and attendance
- Better protection of sensitive data
- Simplified audit trail management
- Need for better and simpler user experience
