Law Enforcement

In-Field Preliminary Identification of Suspects and Victims
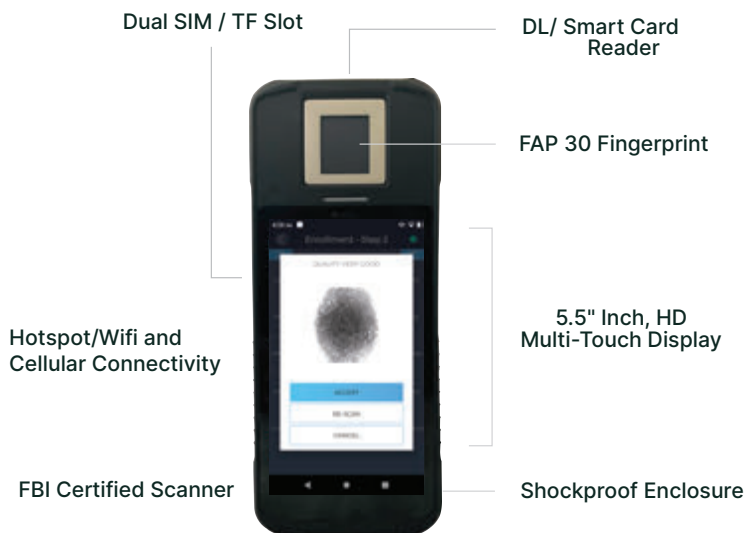

RapID Mobile ID
at your fingertips

Fulcrum's RapID Mobile ID Utilizes the Credence ID Credence-3™

Credence-3™ is a cost-effective Andriod-based next-generation biometric identity platform with the features of an integrated FAP 30 FBI-certified 500 DPI fingerprint sensor along with a 13 MP camera. The RapID Mobile ID Device is a powerful tool for the street-level identification of subjects, eliminating the need for transport to a LiveScan station, reducing identification time.

Enhances Officer Safety and Agency Operations

- Dual SIM / TF Slot
- DL/ Smart Card Reader
- FAP 30 Fingerprint
- Hotspot/Wifi and Cellular Connectivity
- 5.5" Inch, HD Multi-Touch Display
- FBI Certified Scanner
- Shockproof Enclosure

🏴 TXDPS Certified

Searches State Fingerprint Databases and the Repository for Individuals for Special Concern

5 minute response time

RapID Mobile ID supports mobile identification searches using from two to ten fingerprints for comparisons against:

- Known Persons in the state AFIS databases
- Wanted Persons (including the Immigration Violator File)
- National Sexual Offender Registry Subjects
- Known or appropriately Suspected Terrorists
- Other Persons of Special Interest

Other State Certifications Available

Hit responses are received within minutes with Master Name, the FBI Number, and limited NCIC information with the ability to request RAP sheets and Photos if provided by the State AFIS.
